## Simplify your field device wiring

ZIPport™ multi-port interconnection junction blocks provide a simple and effective way to organize machine wiring for a variety of control systems, such as machinery, packaging equipment and conveying systems. Wire multiple sensors to a single block with one exit cable connecting to the control panel.

## Choose from a variety of configurations

- Four, six and eight-pole port configurations
- Choice of one or two I/O per port
- Standard M12-style cable connections
- IP 67, UL, RoHS

- Reduces wiring errors
- Saves time and space
- Reduces installation cost

# ...to panel interface boxes

PanelInterface

## Component interface without opening enclosure doors!

ZIPport™ panel interface connectors (PICs) are pass-through units that mount to the outside of electrical control panels containing PLCs or other programmable devices. Using PICs allow access to those devices without the risks of working with an open electrical panel.

- Aluminum housing with gasket
- Over 30 configurations
- Single, duplex, or GFCI power outlets plus communication ports
- Communication connectors available include D-sub, RJ45, RJ12, Ethernet and Allen-Bradley Data Highway
- NEMA and UL rated; RoHS compliant
