TECHNOLOGY THAT MAKES YOUR JOB EASIER

www.productivity3000.com/boosters

TOP Productivity Boosters #4

- Speed and power
- Flexible design
- Integrated I/O
- **Communications**
- Powerful programming
- Advanced instructions
- HELP when you need it
- Extreme HMI
- Helpful diagnostics
- Data exchange

VOTED #1 Best in SERVICE 9 YEARS
2001-2009

No other controller can do this!

Use the technology built into the Productivity3000 programmable automation controller to make your job easier. Don't pay extra or take up valuable rack space for communications modules. With its industry-leading seven built-in communication ports, this CPU has phenomenal cosmic power in an itty-bitty living space!

- Plug-and-play USB or Ethernet programming and monitoring
- USB local I/O expansion port (up to four additional local I/O racks)
- USB port for data logging to removable drive
- Ethernet remote I/O expansion port (up to 32 remote racks plus 64 AC drives)
- High-speed Ethernet port for HMI (up to 32 C-more panels), peer-to-peer and business system networking using popular protocols such as Modbus TCP; SMTP for sending emails
- Two serial ports for peripheral device interface or controller networking via Modbus RTU or custom ASCII protocols
