#10

- Speed and power
- Flexible design
- Integrated I/O
- Communications
- Powerful programming
- Advanced instructions
- HELP when you need it
- Extreme HMI
- Helpful diagnostics
- **Data exchange**

DAQ

SCADA

Easy DAQ or SCADA with low-cost I/O and practical software

Use the technology built into the Productivity3000 programmable automation controller to make your job easier. If you need data collection - from the factory floor, lab, or field - it's a system worth looking at.

One program instruction in the controller connects and passes data to all the common database formats - Microsoft Access, ODBC, and SQL Server. Low-cost server software (DataWorx P3K, starting at \$595) makes the data readily available to your upstream application.

The **FREE** Productivity Suite programming software comes with a trial version of DataWorx P3K, so you can experiment with and test your database application with no risk!

For simple data logging, the CPU can write data to a removable mass storage device (USB) on an event or time basis.
