

Hydraulic Power Unit Heat Exchangers

Overview

These heat exchangers are designed specifically to fit the Bucher HPUs to reduce heat buildup during higher duty cycles. Bracket and hardware included for mounting to TEFC motor. By maintaining a lower oil temperature, hydraulic fluid lasts longer and components work more effectively, having a higher life expectancy.

* To obtain the most current agency approval information, see the Agency Approval Checklist section on the specific part number's web page.

For additional details see manufacturer's technical specifications, manuals and inserts (where applicable).

Note: These oil coolers are not suitable for use in hydraulic systems operating with water-glycol or high water base fluids without a corrosion inhibitor suitable for aluminum and copper component protection.
