## Switch enclosures

Switch Enclosures			
Specification Standard	Enclosure Material	Gasket Material	Degree of Protection
CEI EN 60947-5-1	Thermoplastic ABS, conforms to UL94/HB	Caoutchouc (rubber) foam	IP65 according to CEI EN 60529

**SA107-40SL SA105-40SL SA100SL**

Enclosures have molded knock-outs for 1/2" conduit fittings.

### Important notes about enclosure depth and over-tightening

Switches with two-deep contact blocks require enclosures that are 74mm deep: 51mm-deep enclosures are too shallow and the switch contact block will not fit.

For switches with one-deep contact blocks, either 51mm-deep or 74mm-deep enclosures can be used.

Also, do not over-tighten when securing switch in the enclosure body. Over-tightening will crack the plastic body of the enclosure.

When installing pushbutton, switches, and joysticks with securing screws, ensure that they have good purchase on area away from the perforated key-way slots made for other switch types. Securing screws should be tightened to 4.5 lb-in or less.

Dimensions: mm [inches]

For example: If using a switch having a two-deep contact block with a two-hole enclosure, order a 74mm-deep SA106-40SL, not a 51mm-deep SA105-40SL.

### No-hole model

No Hole Model					
Part Number	Color	Price	Drawing Link	Hole Size/Depth	Mounting Instructions
SA111-00	Gray	\$13.50	<a href="#">PDF</a>	No Holes	Tighten 22mm devices only as needed to provide proper sealing. Over-tightening will crack plastic body.

Note: This enclosure works with most 22mm pushbuttons but may not work with Cutler-Hammer E22 series pushbuttons. Check your pushbutton dimensions before ordering.

## Specifications

### Assembly information

These pushbuttons and indicator lights are supplied with the appropriate contact blocks, unless otherwise indicated. Use these drawings as a guide to make sure there is adequate clearance behind the panel.

### Dimensions

mm  
[inches]

**Pushbuttons and selector switches**

**Illuminated pushbuttons and selector switches/indicator lights**

### Mounting

**This layout is suitable if all switches are 230V or less and the same polarity.**

**This layout is suitable if all switches are 400V or less and different polarity.**

**NOTE:** Contact blocks can be arranged up to three deep by two wide.
