Edison Power Distribution Blocks

Short-Circuit Current Rated Power Distribution Blocks

We offer distinctly different styles of short-circuit current rated Power Distribution Blocks and Terminal Blocks to match different application needs.

- Enclosed style or Open style
- UL1953 Listed power distribution blocks or UL1059 Recognized terminal blocks, that have different minimum spacing requirements.

The table below can assist in the selection of the correct series for your application requirements.

Why are these important?

Assembly short-circuit current ratings (SCCRs) are now required in the 2005 NEC® and UL508A Listed industrial control panels.

Marking the SCCR on:

- Industrial Control Panels (NEC ® 409.110)
- Industrial Machinery Electrical Panels (NEC® 670.3(A))
- HVAC equipment (NEC ® 440.4(B)

The above sections are now required by the National Electrical Code. Power Distribution Blocks or Terminal Blocks not marked with an SCCR are typically one of the weakest links and may limit an assembly to no more than 10 kA SCCR per Table SB4.1 UL508A. The EPDB series and HPB series Power Distribution Blocks have increased spacing required where used in feeder circuits in equipment listed to UL508A. The PB series UL1059 Terminal Blocks must be evaluated for proper spacing. Also, for building wiring systems, the EPDB series and HPB series power distribution blocks can be used to meet the 2005 NEC ® requirements in section 376.56(B) for power distribution blocks in wireways.

| | Edison Power Distribution Blocks Selection Guide* | | | | | | | | | | |
|--------|---|------------------------------|-----|------------------------------------|--|---|-----------------|--|--|--|--|
| Series | UL | UL † Enclosed High SCCR** | | Spacing*** 1" Air 2" Surface | Industrial Control Panels UL 508A Branch Circuit | Industrial Control Panels UL 508A Feeder Circuit | HVAC UL 1995 | Wireways NEC® 376.56(B) (Requires UL 1953) | | | |

| PB | UL 1059 Recognized Terminal Blocks | No**** | Yes | No***** | Yes | No***** | Yes | No | | | |

† IP-20 finger-safe under specific conditions.

*Refer to specific UL standards and NEC sections for a complete application guide.

**When protected by proper fuse class with maximum ampere rating specified or smaller.

This does not apply to PB40, PB51 and PB71 series.

***See Minimum Space Requirements for Equipment table below.

****Optional covers are available. They are not IP-20 rated, but do provide additional protection against direct contact with Live Parts.

***** Exception: Yes, if single pole units installed with proper spacings.

| Minimum Space Requirements for Equipment | | | | | | | | | |
|--|-----------------------|-------------------------------------|---|--|--|--|--|--|--|
| UL Standard | Pai | etween Live rts of e Polarity | Spacing Between Live Parts and Grounded Parts or Enclosures, | | | | | | |
| | Through Air @ 600V | Over Surface @ 600V | Through Air and Over Surface @ 600V | | | | | | |

| UL 1995 HVAC | 3/8" | 1/2" | 1/2" | | | | | | |

Note: Refer to specific UL standards for complete spacing details.

EPDB Series Edison Finger-Safe Power Distribution Blocks

Finger-safe distribution blocks

Use Finger-safe Power Distribution Blocks to manage your power distribution needs, from splitting primary power circuits into a variety of branch circuits to providing a fixed junction tap-off point. The modular design allows the end user to select and configure the number of poles required by each application. These blocks are engineered to allow copper and aluminium conductors and maintain an SCCR rating of 200kA. These features make these blocks the perfect solution to today's power circuit wiring requirements.

Features

- Fully enclosed block for touch-safe isolation of live parts
- IP20 rating under specific conditions
- Integrated DIN-rail or direct panel mounting. (Panel mount only for <u>EPDB306</u> and <u>EPDB702</u>)
- Captive termination screws cannot be lost
- Used in UL508A panels for both feeder and branch circuit applications
- Suitable for both factory and field wiring
- Tin-plated aluminum connectors suitable for copper and aluminum conductors

Ratings

- Ampere ratings from 175 Amps to 760
 600 VAC or VDC
- Short Circuit Current Rating (SCCR) 200kA with proper fusing
- Flammability: UL 94V0

Agency Approvals

- UL 1953 Listed File E256146, Guide QPQS
- CSA Certified Class 6228-01, File 700490
- CE component IEC 60947-7-1
- IEC-60529, IP20 (Finger-Safe) See table for specific conditions.

| | Finger-safe Power Distribution Blocks Selection Table | | | | | | | | | | | |
|-------------|---|---------|---|----------|-----|----------|----------|-----------------|--|--|--|--|
| Series | Part Number | Amps | Description | SCCR Rtg | Qty | Weight | Price | Drawing Link | | | | |
