

Analog Voltage Input Modules

F2-04AD-2 4-Channel Voltage Analog In \$432.00

This module can be powered by either a 12VDC or 24VDC power supply, and is a direct replacement for F2-04AD-2L modules.

| | |
|---|---|
| Number of Channels | 4, single ended (1 common) |
| Input Ranges | 0 to 5 V, 0 to 10 V, $\pm 5V$, $\pm 10V$ |
| Resolution | 12 bit (1 in 4096) |
| Active Low-pass Filtering | -3dB at 80Hz, 2 poles (-12dB per octave) |
| Input Impedance | >20M Ω |
| Absolute Maximum Ratings | -75 to +75 VDC |
| Converter Type | Successive approximation |
| Conversion Time (PLC Update Rate) | 4 channels per scan maximum (D2-262 CPU) |
| Linearity Error (End to End) | ± 1 count (0.025% of full scale) maximum ± 2 counts maximum (bi-polar) |
| Input Stability | ± 1 count |
| Full Scale Calibration Error (offset error not included) | ± 3 counts maximum |
| Offset Calibration Error | ± 1 count maximum (0V input) |
| Step Response | 8.2 ms to 95% of F.S change |

See Wiring Solutions for part numbers of **ZIPLink** cables and connection modules compatible with this I/O module.

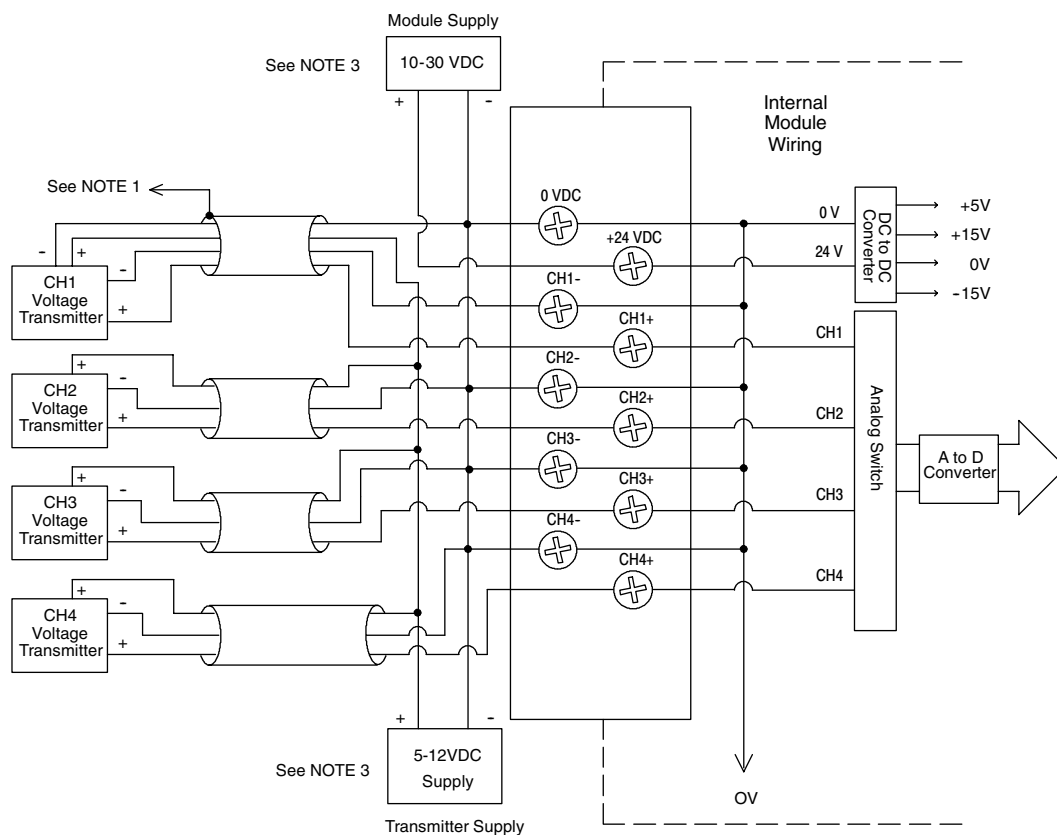

| | |
|--------------------------------------|---|
| Maximum Inaccuracy | $\pm 0.1\%$ @ 77°F (25°C) $\pm 0.3\%$ 32° to 140°F (0° to 60°C) |
| Accuracy vs Temperature | ± 50 ppm/°C full scale calibration change (including maximum offset change) |
| Digital Input Points Required | 16(x) input points (12 binary data bits, 2 channel ID bits) |
| Base Power Required 5VDC | 110mA |
| External Power Supply | 5mA maximum, +10 to +30 VDC |
| Operating Temperature | 32° to 140°F (0 to 60°C) |
| Storage Temperature | -4° to 158°F (-20° to 70°C) |
| Relative Humidity | 5% to 95% (non-condensing) |
| Environmental Air | No corrosive gases permitted |
| Vibration | MIL STD 810C 514.2 |
| Shock | MIL STD 810C 516.2 |
| Noise Immunity | NEMA ICS3-304 |
| Terminal Type (included) | Removable; D2-8IOCON |

Note 1: Shields should be grounded at the signal source.

Note 2: Unused inputs should be jumpered together (i.e. CH4- to CH4+).

Note 3: More than one external power supply can be used provided the commons are connected together.

Wiring Solutions

Wiring Solutions using the ZIPLink Wiring System

ZIPLinks eliminate the normally tedious process of wiring between devices by utilizing prewired cables and DIN rail mount connector modules. It's as simple as plugging in a cable connector at either end or terminating wires at only one end. Prewired cables keep

installation clean and efficient, using half the space at a fraction of the cost of standard terminal blocks. There are several wiring

solutions available when using the ZIPLink System ranging from PLC I/O-to-ZIPLink Connector Modules that are ready for field

termination, options for connecting to third party devices, GS, DuraPulse and SureServo Drives, as well as special relay, transorb and communications modules. Pre-printed I/O-specific adhesive label strips for quick marking of ZIPLink modules are provided with ZIPLink cables. See the following solutions to help determine the best ZIPLink system for your application.

Solution 1: Do-more, DirectLOGIC, CLICK and Productivity Series I/O Modules to ZIPLink Connector Modules

When looking for quick and easy I/O-to-field termination, a ZIPLink connector module used in conjunction with a prewired ZIPLink cable, consisting of an I/O terminal block at one end and a multi-pin connector at the other end, is the best solution.

Using the PLC I/O Modules to ZIPLink Connector Modules selector tables located in this section,

1. Locate your I/O module/PLC
2. Select a ZIPLink Module
3. Select a corresponding ZIPLink Cable.

Solution 2: Do-more, DirectLOGIC, CLICK and Productivity Series I/O Modules to 3rd Party Devices

When wanting to connect I/O to another device within proximity of the I/O modules, no extra terminal blocks are necessary when using the ZIPLink Pigtail Cables. ZIPLink Pigtail Cables are prewired to an I/O terminal block with color-coded pigtail with soldered-tip wires on the other end.

Using the I/O Modules to 3rd Party Devices selector tables located in this section,

1. Locate your PLC I/O module
2. Select a ZIPLink Pigtail Cable that is compatible with your 3rd party device.

Solution 3: GS Series and DuraPulse Drives Communication Cables

Need to communicate via Modbus RTU to a drive or a network of drives?

ZIPLink cables are available in a wide range of configurations for connecting to PLCs and SureServo, SureStep, Stellar Soft Starter and AC drives. Add a ZIPLink communications module to quickly and easily set up a multi-device network.

Using the Drives Communication selector tables located in this section,

1. Locate your Drive and type of communications
2. Select a ZIPLink cable and other associated hardware.

ZIP LINK™ Wiring Solutions

AUTOMATIONDIRECT

Solution 4: Serial Communications Cables

ZIPLink offers communications cables for use with **Direct**LOGIC, CLICK, and Productivity CPUs, that can also be used with other communications devices. Connections include a 6-pin RJ12 or 9-pin, 15-pin and 25-pin D-sub connectors which can be used in conjunction with the RJ12 or D-Sub feedthrough modules.

Using the Serial Communications Cables selector table located in this section,

1. Locate your connector type
2. Select a cable.

Solution 5: Specialty ZIPLink Modules

For additional application solutions, **ZIP**Link modules are available in a variety of configurations including stand-alone relays, 24VDC and 120VAC transorb modules, D-sub, RJ12 and RJ45 feedthrough modules, communication port adapter and distribution modules, and SureServo 50-pin I/O interface connection.

Using the **ZIP**Link Specialty Modules selector table located in this section,

1. Locate the type of application
2. Select a **ZIP**Link module.

Solution 6: ZIPLink Connector Modules to 3rd Party Devices

If you need a way to connect your device to terminal blocks without all that wiring time, then our pigtail cables with color-coded soldered-tip wires are a good solution. Used in conjunction with any compatible **ZIP**Link Connector Modules, a pigtail cable keeps wiring clean and easy and reduces troubleshooting time.

Using the Universal Connector Modules and Pigtail Cables table located in this section,

1. Select module type
2. Select the number of pins
3. Select cable.

PLC I/O Modules to ZIPLink Connector Modules – Do-more!/DL205

| Do-more / DL205 PLC Input Module ZIPLink Selector | | | | |
|---|------------|-------------|-----------------|--|
| PLC | ZIPLink | | | |
| Input Module | # of Terms | Component | Module Part No. | Cable Part No. † |

| | | Fuse | | ZL-D2-CBL19-1 ZL-D2-CBL19-2 |

† X in the part number represents a 45° angle plug

* Select the cable length by replacing the * with: Blank = 0.5 m, -1 = 1.0 m, or -2 = 2.0 m.

¹ To make a custom cable for the 32-point modules, use: Solder-style 180° connector ZL-D24-CON or Solder-style 45° connector ZL-D24-CON-X

² Caution: The D2-04TD1, D2-04TRS, and F2-08TRS outputs are derated not to exceed module specs 2A per point and 2A per common when used with the ZIPLink wiring system.

³ The F2-08TR outputs are derated not to exceed 2A per point and 4A per common when used with the ZIPLink wiring system.

⁴ Fuses (5 x 20 mm) are not included. See Edison Electronic Fuse section for (5 x 20 mm) fuse. S500 and GMA electronic circuit protection for fast-acting maximum protection. S506 and GMC electronic circuit protection for time-delay performance. Ideal for inductive circuits.

To ensure proper operation, do not exceed the voltage and current rating of ZIPLink module. ZL-RFU20 = 2A per circuit; ZL-RFU40 = 400mA per circuit.

Note: ZIPLink Connector Module specifications follow the Compatibility Matrix tables. ZIPLink Cables specifications are at the end of this ZIPLink section.

Dimensions and Installation

Understanding the installation requirements for your DL205 system will help ensure that the DL205 products operate within their environmental and electrical limits.

Plan for safety

This catalog should never be used as a replacement for the user manual. The user manual, D2-USER-M (downloadable online), contains important safety information that must be followed. The system installation should comply with all appropriate electrical codes and standards.

Environmental specifications

The Environmental Specifications table at the right lists specifications that apply globally to the DL205 system (CPUs, bases, and I/O modules). Be sure that the DL205 system is operated within these environmental specifications.

Base dimensions and mounting

Use the diagrams below to make sure the DL205 system can be installed in your application. To ensure proper airflow for cooling purposes, DL205 bases must be mounted horizontally. It is important to check these dimensions against the conditions required for your application. For example, it is recommended that approximately 3" of space is left in front PLC surface for ease of access and cable clearances. Also, check the installation guidelines for recommended cabinet clearances.

| Environmental Specification | Rating |
|--------------------------------------|---|
| Storage Temperature | -4°F to 158°F (-20°C to 70°C) |
| Ambient Operating Temperature | 32°F to 131°F (0°C to 55°C) |
| Ambient Humidity | 30% to 95% relative humidity (non-condensing) |
| Vibration Resistance | MIL STD 810C, Method 514.2 |
| Shock Resistance | MIL STD 810C, Method 516.2 |
| Noise Immunity | NEMA (IC33-304) |
| Atmosphere | No corrosive gases |

| Base | A | B | C | D |
|---|--------------|--------------|--------------|--------------|
| D2-03B-1, D2-03BDC1-1 | 6.77" 172mm | 6.41" 163mm | 5.8" 148mm | 7.24" 184mm |
