

GS3 DURAPULSE Accessories – Feedback Card

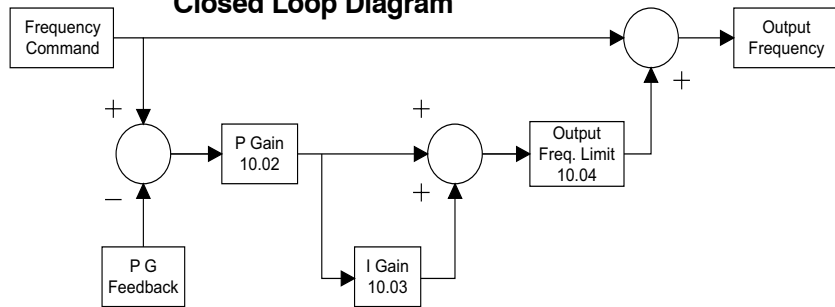

Feedback Card for DURAPULSE AC Drives		
Part Number	Price	Drive Model
GS3-FB	\$58.00	GS3-xxxx
The GS3-FB feedback card is for use only with DURAPULSE AC drives.		

Description

The GS3-FB card is used to add another layer of precision control to the already precise control algorithm utilized in the DURAPULSE drive series. This added control is activated by selecting control modes V/Hz closed loop control or sensorless vector with external feedback. The feedback mechanism uses pulses generated by an external encoder or pulse generator. Unlike other feedback types, the GS3-FB accommodates the four most common encoder signal types: output voltage, open collector, line driver, and complimentary.
