

# GS4-Specific Optional Accessories – Conduit Boxes

## Accessories Applicable Only to GS4 AC Drives

Please refer to the "GS/DURApulse AC Drives – Accessories" section for accessories applicable to multiple families of GS/DURApulse AC Drives, including GS4.

### Conduit Boxes

Optional Conduit Box Kits can be ordered separately. These kits bolt onto the bottom of the applicable GS4 drive to provide a convenient connection point for conduit entry, allowing the GS4 to maintain a IP20/NEMA 1 environmental protection rating; especially useful for GS4 drives mounted outside of an electrical control panel.

**Note:** GS4 Frames A through C have integral conduit box space built into the drive. No separate conduit boxes are necessary or available.

\* GS4 Frame Sizes A through C have integral conduit box space built into the drive; separate conduit boxes are not necessary nor available.  
 \*\* Conduit Box Kits include mounting hardware; box base, box cover, bushings, and screws.  
 Conduit box dimensions are shown with the AC drive dimensions, as mounted on the drive.

# GS4-Specific Optional Accessories – Flange Mounting Kits

## Flange Mounting Kits

Optional GS4 drive flange mounting kits allow the heat sinks on the back of select GS4 drives to be positioned through the back of the control enclosure. Since a majority of the heat generated by the GS4 drive will be outside the enclosure, heat load will be reduced and a smaller enclosure may possibly be used. These flange mounting kits are applicable to GS4 drive frame sizes A through C.

**NOTE:** GS4 Frames D0, D, E, and F have integral flange mounting hardware; additional Flange Mounting Kit not required (see cutout dimensions below).  
Frame size G cannot be flange-mounted.
