

Stripping Tools

ErgoStrip® Wire and Cable Stripper

The KNIPEX ErgoStrip® Universal Dismantling Tool is a single-tool solution for stripping, slitting, and dismantling the most common cable types found in electrical and data installations: multi-conductor round cable, coaxial cable, and Cat 5–7 twisted-pair data cable. Its innovative pistol grip design positions three distinct functions in one compact body: an outer sheath splitter for round cable (8–13mm OD), a concealed longitudinal cable sheath cutting blade, and precision-ground stripping holes for conductor sizes from 0.2 to 4.0 mm². Made from glass-fiber reinforced plastic with a soft-zone overmold for secure handling, the ErgoStrip® is engineered for the technician who works in tight spaces and needs reliable, consistent strip quality on every pass.

Features

- Strips round cable, coaxial cable, and Cat 5–7 twisted-pair data cable
- Ergonomic pistol grip with soft plastic zone for comfortable, secure handling
- Slim, conical tool end for access in confined spaces
- Precision-ground stripping holes for 0.2, 0.3, 0.8, 1.5, 2.5, and 4.0 mm²
- Location ridges between stripping holes for accurate wire alignment
- Opening spring and locking device for easy operation and secure storage
- Concealed blade for longitudinal cable sheath slitting
- Glass-fiber reinforced plastic housing
- Right-handed operation
