

Excelon® Plus 82 Series Air Regulators

Part No.
R82G-2AK-RFG

Part No.
R82G-3AK-RMG

Excelon Plus is the latest generation of Norgren Air Preparation equipment designed to meet the needs of today's customer. It offers exceptional performance, is compact, lightweight, robust and is suitable for most industrial applications.

With primary pressure up to 300psi (20bar) Excelon Plus 82 series regulators offer outlet pressure ranges of 58psi (4bar) and 145psi (10bar). The adjustment knob is pulled up to show a red band while pressure is adjusted. Pushing the knob down after reaching the desired pressure reveals a padlock hole allowing the regulator to be locked very easily.

Features

- Adjustable outlet pressure range of 4-58 psi (0.28-4 bar) or 4-145 psi (0.28-10 bar)
- Lockable adjustment knob
- Integrated pressure gauge
- 1/4" and 3/8" PTF (FNPT - female NPT threaded ports)

See www.AutomationDirect.com for a wide variety of fitting options
