

ACUAMP™ Switches and Transducers

Overview

The ACUAMP series is a family of high performance current sensors offering outstanding features, flexibility and durability at an incredible price. Choose from a wide selection of Current Transducer and Current Switch models, all designed in a rugged industry standard feed-through package, consisting of both fixed core and split core models. Each model

has multiple input ranges (set by movable jumpers) for maximum flexibility across many current ratings. The current transducer output choices include 4 to 20mA, 24 VDC loop-powered and 0 to 10 volt self-powered analog outputs. The Current Switch outputs are isolated solid state switches and are available in Normally Open configurations. A unit featuring field adjustable time delay is

also offered in the Current Switch series. All models are panel-mountable as standard, and convenient DIN-rail adapter accessories are available. Use the selection guide to find the best sensor module for your requirements.

ACUAMP Specifications by Model Type					
Specifications	Transducer	Transducer with True RMS	Switch	Switch	Switch
Model	ACT	ACTR	ACS150	ACS200	ACSX
Input Range	Jumper selectable: ACT005: 0 to 2 A 0 to 5 A ACT050: 0 to 10 A 0 to 20 A 0 to 50 A ACT200: 0 to 100 A 0 to 150 A 0 to 200 A ACT750: 0 to 375 A 0 to 500 A 0 to 750 A ACT2000: 0 to 1000 A 0 to 1333 A 0 to 2000 A	Jumper selectable: ACTR005: 0 to 2 A 0 to 5 A ACTR050: 0 to 10 A 0 to 20 A 0 to 50 A ACTR200: 0 to 100 A 0 to 150 A 0 to 200 A ACTR750: 0 to 375 A 0 to 500 A 0 to 750 A ACTR2000: 0 to 1000 A 0 to 1333 A 0 to 2000 A	Normally Open: -F core: 1 to 150 A -S core: 1.75 to 150 A Normally Closed: -F core: 1 to 150 A -S core: 1.75 to 150 A	Jumper Selectable: Normally Open: -F core: 1 to 6 A 6 to 40 A 40 to 175 A -S core: 1.75 to 6 A 6 to 40 A 40 to 200 A Normally Closed: -F core: 1 to 6 A 6 to 40 A 40 to 175 A -S core: 1.75 to 6 A 6 to 40 A 40 to 200 A	Jumper Selectable: Normally Open: -F core: 1.5 to 12 A 12 to 55 A 55 to 175 A -S core: 2 to 12 A 12 to 55 A 50 to 200 A Normally Closed: -F core: 1.5 to 12 A 12 to 55 A 55 to 175 A -S core: 1.5 to 12 A 12 to 55 A 50 to 200 A
Output Range	-10 models: 0 - 10 VDC -42L models: 4 - 20 mA, loop-powered	4 - 20 mA, loop-powered true RMS	Normally Open: 0.15 A @ 240 VAC or VDC Normally Closed: 0.2 A @ 135 VAC or VDC	Normally Open/Normally Closed AC model: 1A @ 240 VAC Normally Open/Normally Closed DC model: 0.15A @ 30 VDC	Normally Open/Normally Closed AC model: 1A @ 240 VAC Normally Open/Normally Closed DC model: 0.2 A @ 135 VAC/VDC
Frequency Range	-10 models: 50 to 60 Hz sinusoidal waveforms only -42L models: 20 - 100 Hz	10 to 400 Hz non-sinusoidal waveforms	6 to 100 Hz	6 to 100 Hz	50 to 100 Hz
Response Time	-10 models: 100 ms -42L models: 300 ms	600 ms	120 ms	40 to 120 ms	Field adjustable time delay: 0.12 to 15 seconds
Sensing Aperture	ACT005, ACT050, ACT200: -F core: 0.75" (19mm) dia. -S core: 0.85" (21.6mm) sq. ACT750, ACT2000: 3.0" (76.2 mm) dia	ACTR005, ACTR050, ACTR200: -F core: 0.75" (19mm) dia. -S core: 0.85" (21.6mm) sq. ACTR750, ACTR2000: 3.0" (76.2 mm) dia	-F core: 0.75" (19mm) dia. -S core: 0.85" (21.7mm) sq.	-F core: 0.55" (13.97mm) dia. -S core: 0.85" (21.7mm) sq..	-F core: 0.75" (19mm) dia. -S core: 0.85" (21.7mm) sq.

The ACSX series high-performance current-operated switch has a field-adjustable time delay feature that minimizes nuisance trips during start-up and operation. These switches are designed for motor status applications where setpoint accuracy and repeatability are critical and offer a linear setpoint characteristic and constant hysteresis.

Applications

Motor Protection

- Serves as an electronic proof-of-operation; detects current draw changes in motors when they encounter problems such as pumps running dry or impending bearing failure
- Non-intrusive; less expensive to install than differential pressure flow sensors or thermal switches
- Much quicker response time than Class 10 overload relays

High Inrush or Temporary Overload Current

- Adjustable start-up/delay timer allows 0-15 second delay to eliminate nuisance trips from high inrush or short overload conditions

Features

Standard features include self-powering, jumper-selectable ranges and a choice of outputs and core styles

- Five-year warranty
- Adjustable start-up/delay timer is field-adjustable from 0.2 to 15 seconds to eliminate nuisance alarms caused by start-up inrush or temporary overcurrent conditions.
- Choice of N.O./N.C. AC or AC/DC outputs: Contact ratings of 1.0A @ 240 VAC or universal outputs of 0.15A @ 240 VAC/VDC for use with most standard motor control systems.
- Improved ease of installation and use:
 - 1.0A rating eliminates need for time delay relay
 - Self-powered, split-core models simplify installation
 - Status LED provides visual indication of setpoint trip and contact action
- Industrial grade performance - constant hysteresis and linear setpoint response for greater accuracy

Agency Approvals

Switches and Transducers Application Guide

Application Guide

ACUAMP Current Sensors are a great fit for many applications, including material handling, fan and pump applications, and heating systems. With two basic models, Current Transducers and Current

Switches, this sensor family is a great fit for almost any current sensor need, ranging from monitoring loads to preventive maintenance. Models with the ability to read True RMS non-sinusoidal waveforms

make it easy to monitor applications containing variable frequency drives. Use the application examples to help choose the best sensor model for your application.

Pump Jam & Suction Loss Protection

Heater Life Prediction

Pump Load Monitoring

Crusher/Grinder/Shredder Motor Interlocks

The performance of size reduction equipment like crushers or grinders can be optimized by controlling the in-feed in order to

- Help prevent jamming
- improve the uniformity of the resultant product
- Enhance overall production efficiency

Lamp Failure Detection
