## Which switch is right for you?

## Mersen Disconnect Switches

FERRAZ SHAWMUT IS NOW MERSEN

UL 98 Rated Disconnect Switches used for:

- Service entrance or main panel disconnects up to 600 VAC, 800 A
- "Make and Break" power circuit applications on load
- NFPA 79 Solutions
- Motion disconnecting means NEC 430.101-403.113

## UL 98 Rated Disconnect Switches

The AutomationDirect power products line now includes 600 VAC / 250 VDC heavy-duty fusible and non-fusible electrical disconnects from Mersen. The SC and FB series meet UL 98 standards and are UL, CSA, CE and IEC rated. The series is designed with the most up-to-date power disconnect technology available - "make and break" power circuits on load. In addition, a wide array of handles is available, meeting OSHA padlocking requirements, NEMA configurations, defeater options and NFPA 79 requirements. These switches have been tested an dapproved for use in the most demanding applications, including "service entrance".

## SC series

- Non-fusible rotary disconnect switches
- Makes/Breaks loads up to 800 amps
- Front operated
- Visible blade contacts
- Line side shrouding comes standard with switch

## FB series

- Fusible rotary disconnect switches
- Makes/Breaks loads up to 200 amps
- Front operated
- Uses Class CC and Class J fuses
- Line side shrouding comes standard with switch
- Touch safe fuse covers standard with switch
- Can be used in "reverse" applications where the mains are fed in on the load side

## SD Series Load Switches

## UL 508 Rated Load Switches used for:

- Disconnect (device without on-load making and breaking capacity)
- Switches at installation head or for resistive circuits (heating, lighting, except discharge lamps, etc.)
- Switches in secondary circuits or reactive circuits (capacitor banks, discharge lamps, shunt motors, etc.)

## UL 508 Rated Load Switches

The SD series, our non-fused load-break disconnects allow breaking and disconnecting of equipment loads up to 600 VAC, at nominal currents from 16A to 125A. These disconnect switches are UL listed as Manual Motor Controllers and are commonly used as motor isolation disconnects in junction boxes local to the motor. When upstream short-circuit protection is provided, they may be used as enclosure disconnects.

- Loads from 16 to 125 amps
- High breaking capacity
- Double break contacts
- High electrical and mechanical endurance
- Resistant to damp heat
- IP20 degree of protection
- HACR (heating, air conditioning and refrigeration) rated
- 35 mm DIN rail mountable or panel mounting
- Modular 45 mm frame
- Remote handles with door interlock feature can be locked with up to three padlocks in the OFF position

## Ratings

. 600 VAC • IP 20

- 16 to 125 amps

## Approvals

- UL 508/cUL File: UL

## E226699

- IEC/EN File No. 60947/l-3
- CE mark

## Mersen quality at AutomationDirect prices

## FERRAZ SHAWMUT IS NOW MERSEN

## Overview

Our power products line includes 600 VAC/250 VDC heavy-duty fusible and non-fusible disconnects from Mersen. Meeting UL 98 standards, the SC Series and FB Series are designed with the latest disconnect technology available, "make and break" power circuits under load, and are UL, CSA, CE and IEC rated. A wide array of handles is available, meeting OSHA padlocking requirements, NEMA configurations, defeater options and NFPA 79 requirements.
The SC Series switches have been tested and approved for use in the most demanding applications, such as "service entrance" and main panel disconnects. These heavy duty SC Series switches are available in 30-800 amp ratings; switches up to 400 amps are equipped with visible blade contacts. The available defeatable pistol handles automatically re-latch when the panel door is closed, eliminating the need for tools to reset the latch.

The FB Series of fusible disconnects use double break contacts per pole, up to 200 amps, isolating the fuse while the switch is in the OFF position. To reduce or eliminate the danger of accidental contact with live, energized parts, these fusible disconnects are supplied with fuse covers and line side shrouding as a standard safety feature. Used with class CC or J fuses (available from AutomationDirect), the FB SERIES switches provide dependable circuit protection.
As defined in the NFPA 79 standard, section 5.3.3.1 and 6.2.3.1.2, these disconnect switches fully comply with all of the following requirements:

- Isolate the electrical equipment from the supply circuit and have one "OFF" (open) and one "ON" (closed) position only
- Have an external operating means
- Be provided with a permanent means permitting it to be locked in the "OFF" (open) position only independent of door position
- Be operable, by qualified persons, independent of the door position without accessory tools or devices

All the disconnect switches' contacts work independently of the speed and force of the operator. Switches up to 400 amps use silver-tipped contact technology providing the following advantages:

- Best solution for harsh environments
- High on-load break characteristics
- Longer mechanical and electrical life
- Maintenance free switches without grease

Switches above 400 amps use a selfcleaning moving technology that provides high short-circuit withstand.
In the case of welded contacts due to an overload or short circuit condition, the disconnects provide operational features to safeguard the user. As long as the force applied to the handle is not greater than 3 times the standard operational force, the handle will NOT be able to reach the "OFF" position unless the contacts are truly open. This is in accordance with the IEC 947-3 standard.

## mersed Non-Fusible Disconnects

## SC Series

## Overview

Mersen SC Series disconnect switches are heavy duty, manually operated, non-fused disconnect switches, designed using the latest disconnect switch technology available. SC Series switches meet UL98 standards with a product that "makes and breaks" power circuits on load. These switches have been tested and approved for use in the most demanding applications, including "service entrance". Visible blade contacts are standard in SC Series switches up to 400A. Choose from a wide array of handles meeting OSHA padlocking requirements, NEMA configurations, defeater options and NFPA 79 requirements.

## Features

- Service entrance rated
- Compact footprints
- Front operated switches
- Visible blade contacts up to 400 A
- Line side shrouding supplied with switch
- Defeatable pistol handles automatically re-latch when panel door is closed - no tool necessary to reset latch
- External or direct operation handles

## Applications

- Service entrance or main panel disconnects up to $600 \mathrm{VAC}, 800 \mathrm{~A}$
- "Make and Break" power circuit applications on load
- NFPA 79 Solutions

## Ratings

. 600 VAC, 250 VDC
-30, 60, 100, 200, 400, 600, and 800 amperes

- Up to 200 kA short circuit rating when Class CC, J, or L fuses are used externally

## Approvals

- All SC Series switches meet UL 98 requirements
- UL Listed Guide WHTY, File E191605
- CSA C22.2 \# 4 Class 4652 04, File 703166
- IEC 947-3 as a load break disconnect
- CE mark

Components

1 - External Door Handle
2 - Direct Mount Handle Option
3 - NFPA 79 Compliant
Handle Option
4 - Standard Shaft

## Mersen Non-Fusible Disconnects SC Series - Build a Complete Switch

## 30 Amp

STEP 1
Choose a switch body

Switch body

| Switch <br> Body | Ampere <br> Rating | Hp @ <br> Voltage | Interrupt <br> Capacity <br> (kA) |
| :--- | :---: | :--- | :---: |
| SCV30* | 30 | $15 \mathrm{Hp} @ 480 \mathrm{~V}$ | 50 |

*Note: Lugs, shrouds, and screens are integrated into this switch

STEP 2
Choose a handle

Short handles

Standard handles

| Standard Handle |  |
| :--- | :--- |
| HGPB | Pistol, Black,NEMA 1, 3R, 12, Type G. |
| HGPB4 | Pistol, Black, NEMA 4, 4X, Type G, |
| HGPR | Pistol, Red /yellow, NEMA 1, 3R, 12, Type G |
| HGPR4 | Pistol, Red /yellow, NEMA 4, 4X, Type G |

## Direct handles

| Direct Mount Handle |  |
| :--- | :--- |
| HADB1 | Direct mount, Black. No shaft required. |

*Note: Switch Handle will not switch to "test" position with Aux contacts and ACHCD holder installed. Handle will switch to "ON" position.

NFPA 79 compliant handle

| NFPA 79 | Compliant Handle |
| :--- | :--- |
| HADB6 | NFPA 79-compliant, allows operation <br> and padlocking the switch when door is <br> open. Red. No shaft required. |

## STEP 3

Choose a shaft

Short handle shafts

Standard handle shafts

| Shaft for Standard Handle |  |
| :--- | :--- |
| SG120-5 | Type G, 4.7" (120 mm) long |
| SG200-5 | Type G, 7.9" (200 mm) long |
| SG320-5 | Type G,12.6" ( 320 mm ) long |

Shaft not used with Direct Handle

| Select a standard handle. |
| :--- |
| Note: Short handle cannot be used with <br> NFPA79-compliant handle. |

STEP 4
Choose your Accessories

| Accessories | Description | Use With |
| :---: | :---: | :---: |
| ACHCD | Auxiliary contact holder (accommodates up to 4 auxiliary contacts). REQUIRED when using AC3 or AC4. | SCV30 |
| AC3 | Auxiliary contact. One N.O. contact. 10 Amp. 600 VAC REQUIRES ACHCD. Please purchase separately. | SCV30 |
| AC4 | Auxiliary contact. One N.C. contact. 10 Amp. 600 VAC REQUIRES ACHCD. Please purchase separately. | SCV30 |
