Louvers and Filters for Metal Enclosures

Louver Plate Kits

Louver plates provide ventilation or cooling in metal enclosures where excessive moisture or excessive internal heat is a problem. These kits are fabricated from 14-gauge steel and include all hardware for mounting. Kits are easily field installed by making a cutout of the proper size and attaching the louver plate in place. Finish is ANSI 61 gray polyester powder finish over phosphatized surfaces or 316 stainless steel. Filter kit must be ordered separately.

Filter Kits for Louver Plate Kits

Aluminum filters are good for stopping dust and dirt from penetrating the enclosures. These filters are designed to mount behind WAVK series louver plate kits. Mounting holes on filter brackets align with mounting holes on louver kits. Kit consists of aluminum filter, brackets and all necessary hardware for installation. Louver kit must be ordered separately.
