1-800-633-0405 **M Series Magnetic Proximity Sensors**

Overview

Magnetic proximity sensors are used for non-contact position detection beyond the normal limits of inductive sensors. In conjunction with a separate "damping" magnet, magnetic sensors offer very long sensing ranges from a small package size. Depending on the orientation of the magnetic field the sensor can be damped from the front or from the side.

Since magnetic fields penetrate all nonmagnetisable materials, these sensors can detect magnets through walls made of non-ferrous metal, stainless steel, aluminium, plastic or wood. In the food industry the magnetic sensor is often used in connection with a "pig" (cleaning devices which pass through the inside of pipes). These magnetic proximity sensors can detect the exact position of the pig from outside the wall of the stainless steel pipe.

Many clean in place (CIP) systems use magnetic proxes at a "diverter panel" to detect the position of a U-tube through a stainless steel faceplate.

Features:

- Detection through plastic, wood, and any non-magnetisable metals
- Small housings with very long sensing ranges up to 70 mm
- Cylinder and rectangular designs satisfy space-dependent applications
- High mechanical stability in case of shock or vibration
- Flush or non-flush installation in nonmagnetisable metals

Operating Principle

Magnetic sensors use GMR (Giant Magneto Resistive Effect) technology. The measuring cell consists of resistors with several extremely fine, ferromagnetic and non-magnetic layers. Two of these GMR resistors are used to form a conventional Wheatstone bridge circuit which produces a large signal proportional to the magnetic field when a magnetic field is present. A threshold value is defined and an output signal is switched via a comparator.

1-800-633-0405 **M Series Cylindrical Magnetic Proximity** Sensors

8mm, 12mm and 18mm stainless steel

- 8mm, 12mm, and 18mm diameter
- 316L stainless steel housing
- 316L stainless steel or PBT (polybutylene terephthalate) sensing face
- Complete overload protection
- IP67, IP65/IP67 or IP65/IP68/IP69K rated
- 2m axial cable or quick-disconnect termination styles
- Mounting hex nuts included
- Lifetime warranty
