RHINO PSM24-REM360S Redundancy Module

Using two PSM24 power supplies and a redundancy module, you can configure a redundant power system, featuring active current sharing, without any additional components. Even if one power supply fails or becomes disconnected, the second unit will supply full current to the load. The module has an alarm contact for monitoring of operations. The inputs are hot-swappable and can be loaded up to 15A each.

### Redundancy Module

### General Specifications

- **Operating Temperature**: -25°C to +70°C max (-13°F to +158°F), derating above 40°C (104°F)
- **Electromagnetic Compatibility**: In correspondence to connected units (no internal switching device)
- **Redundancy OK Signal**: Trigger threshold at 18 to 22 VDC. Contact closed if one or both inputs failed
- **Dimensions**: Same as model PSM24-090S (see dimensions page)
- **Remote Link Wire 0.5m**: Two cables included with PSM24-REM360S module
- **Remote ON/OFF**: By external contact: ON = J5.3 + J5.4 not shorted
  OFF = J5.3 + J5.4 shorted
- **Alarm Contact Rating**: 30 VDC/1.0 A max

### Redundancy Module Function Diagram

**Note:** this redundancy module only works with the PSM series. Other series of power supplies are not compatible.
RHINO PSM Power Supplies - Accessories

A variety of accessories is available to complement the RHINO PSM power supplies. Choose panel mounting brackets and replacement plug kits from the table below, based on the size of the power supply. There is also a temperature sensor for the battery control module and replacement link cable for the redundancy and battery control modules.

Mounting

PSM power supplies are designed for mounting on a DIN rail. Please allow minimum free space of 80 mm (3.15") above and below, and 50 mm (1.97") on each side of the power supply for air convection. To attach unit onto the DIN rail, hook the top part of clip on DIN rail, then push down and inward until you hear the clipping sound. To remove, pull the latch of the clip using an insulated flat-head screwdriver.

For wall or chassis mounting, use mounting brackets PSM-PANEL1 (for 78W to 180W PSM style power supplies) or PSM-PANEL2 (for 360W and 600W PSM power supplies). Remove the DIN clips and replace with the brackets. Use the countersink screws included with the wall mount kit to attach the brackets to the power supply.
RHINO PSM Panel Mounting Bracket Dimensions

**PSM-PANEL1**

Dimensions: (mm) / (in) = Inch

- Dimensions: 85.0 (3.35)
- 42.5 (1.67)
