Auto-Flex Universal Socket Sets

Titan Auto-Flex sockets flex on a spring-loaded joint that returns to center, giving controlled access to fasteners around obstructions without a separate universal joint. Low-profile 12-point sockets grip a range of fasteners in compact 7-piece sets.

Features

- Spring-loaded flex joint returns to center for controlled reach
- Low-profile 12-point sockets in a 7-piece set
- SAE and metric options
- Chrome-vanadium steel construction

Auto-Flex Universal Socket Sets
