

P2-4906

The Trumeter 49 Series of economically priced 6-figure pushbutton reset electromechanical counters is designed for use where limited space is a factor and when reliability is critical. Rugged operating mechanisms require no lubrication or maintenance. Compact size and minimum space requirements make the 49 Series ideally suited for use in control panels, business machines, and test equipment.

## Features

- Compact
- No maintenance
- Quick reset
- Multiple voltage options

Applications

- Test Equipment
- Control Panels
- Business Machines
- Medical devices

| Approvals | UL file E36690, UL Recognized, CE Compliant |  |  |
| Weight | $5 \mathrm{oz}$. [142g] |  |  |

The 722 Series of electromechanical hour meters provides AC hour meters with an operating range of 90-264VAC $50 / 60 \mathrm{~Hz}$, eliminating the need for two separate meters (one for 115VAC and one for 230VAC). Housing options include 2-Hole Rectangular, Flush-Rectangular, Flush-Round, and 3-Hole Round. The quartz time base ensures accurate long-term time keeping, and the totally sealed case protects against the environment and provides years of reliable service. All models are NEMA 4X, 12 rated when mounted with optional gasket.

## Features

- Operating voltage $90-264 \mathrm{VAC}, 50 / 60 \mathrm{~Hz}$
- Totally sealed
- UL/cUL recognized, CE \& RoHS Compliant
- 6-figure display (99999.9)
- Quartz accuracy
- Available options:
- Gasket kit (for NEMA 4X, 12 rating)

## Applications

- Medical equipment
- Control panels
- Office equipment
- Test equipment
- Generators

732-0001

The 732 Series of electromechanical hour meters provides a DC hour meter with an operating range of $10-80 \mathrm{VDC}$. Models are protected for 2 times battery voltage and/or reverse polarity. Models are available in 3-Hole Round, Flush-Rectangular, Flush-Round and 2-Hole Rectangular housings. The quartz time base ensures accurate long-term time keeping, and the totally sealed case protects against the environment for years of reliable service. These units are NEMA 4X, 12 rated when mounted with the optional gasket.

## Features

- Operating voltage 10-80VDC
- Totally sealed
- UL/cUL Recognized, CE \& RoHS Compliant
- 6 figure, 99999.9
- Quartz accuracy
- Options include gasket kit (for NEMA 4X, 12 rating)

## Applications

- Material handling
- Farming equipment
- Outdoor power equipment
- Construction equipment
- Utility vehicles

5003-008

The 3400 Series LCD Counter/Preset Counter provides a large display with 0.28 in
 [ 7 mm ] high characters and is offered in a range of industry-standard housings.
These counter count and display the number of pulses that appear at the input terminal at a rate of 40 pulses per second (Hz). The input interface handles AC or DC inputs. These Counters are available in several different housings.
A wide operating voltage range (10-300VDC and 20-300VAC) adds versatility. All models are NEMA 4/4X, 12 \& IP66 rated when used with the optional gasket and have a polarized lens which assures high visibility in outdoor environments.

## Features

- Totally sealed from moisture and dirt
- AC and DC voltage input in the same unit
- Compact depth
- Fits in existing panel openings
- Always-on display
- Self-powered (battery life 10+ years)
- Options include:
- Optional remote reset
- Multiple housing options

## Applications

- Medical devices
- Test equipment
- Control panels
- Production equipment
- Office equipment
- Secondary equipment

The 3410 Series LCD Hour Meters provide a large display with 0.28 in [ 7 mm ] high characters and is available in several different housings. A wide operating voltage range (10-300VDC and 20-300VAC) makes the 3410 Series versatile for indoor and outdoor applications. All models are NEMA 4/4X, 12 \& IP66 rated when used with the optional gasket and have a polarized lens which assures high visibility in outdoor environments.

## Features

- Totally sealed from moisture and dirt
- AC and DC voltage input in the same unit
- Compact depth
- Fits in existing panel openings
- Always-on display
- Self-powered (battery life 10+ years)
- Options include:
- Optional remote reset
- Multiple housing options

## Applications

- Medical devices
- Generators
- Control panels
- Production equipment
- Garden tractors
- Marine equipment

## Reset Instructions

1) Remove $A C / D C$ input from Terminals 1 and 2
2) Close dry contact reset on Terminals 3 and 4. Reset will perform within 400 mS .
3) Timing/Counting can resume 200 mS after reset is released.

Notes

1. When interfacing with a solid state relay or AC sensor, the leakage current needs to be considered.
2. Operation beyond the Absolute Voltage Range or the Absolute Maximum Voltage may result in damage to the unit.

Mounting Gaskets for Trumeter 3410 Series LCD Counter/Preset Counters

The 4916 Series incorporates the latest manufacturing technology together

RV2-4916 with basic design to achieve high performance over a wide temperature range with low power consumption. These counters can be mounted by two front flange styles, base mount or behind the panel (front mount). The 4916 has UL approvals and can operate over a wide voltage range of DC or AC power.

The compact design and various mounting styles make it the ideal counter for almost all counting applications. This electro-mechanical counter will not lose its count during power failures or from electrical noise.

## Features

- Low cost
- Patented high-performance mechanism
- UL and cUL approved
- Rugged plastic package
- Wide range of voltages available
- Long life

## Applications

- Mail equipment
- Photo machines
- Vending machines
- Gaming machines
- Elevators
- Copy machines
- Ticket machines

Trumeter 4916 Series 6-Digit Non-Reset Counter Selection Guide

| Part Number | Price |  | Description | Drawing |
| :--- | :---: | :---: | :---: | :---: |

| RV9-4916D | $\$ 24.00$ | 6 digit non-reset counter, 12VDC, 6 figures, front \& V-base mount |  |  |

## Features

- Dual range
- Reflective LCD Display with 8 large ( 8 mm ) digits
- Choice of I/O compliment that includes:
- Switch Input (no voltage)
- Low DC Voltage (3-30VDC) <2mA
- High Voltage (20-300VAC or $10-300 \mathrm{VDC})<2 \mathrm{~mA}$

The Trumeter 6300 LCD Counter offers a range of features such as a high-contrast 8 -digit LCD display with 0.32 in [ 8 mm ] digits. Dry contact, low voltage DC, and high voltage DC and AC inputs are available on the back of the unit.
The 6300 is designed with a rugged plastic housing that is NEMA 4/4X rated when properly installed using the optional gasket. In addition, the unit is compliant with CE's EMC standards to EN61326:2001 for industrial applications, recognized by UL for U.S. and Canadian safety standards, and is compliant with European RoHS and WEEE standards.

- Internal 10+ year battery
- NEMA 4/4X, 12, and IP66 rated
- EMC Compliant to EN61326:2001 for industrial environments
- CE compliant, UL and cUL recognized
- European WEEE \& RoHS Compliant

| Enclosure | NEMA 4/4X, 12 \& IP66 compliant from the front when properly mounted using the optional gasket. |  |  |
| Approvals | CE compliant, UL and cUL recognized, UL file \#E36690 |  |  |
| Environmental Compliance | Compliant to European WEEE and RoHS |  |  |

Notes

1. When interfacing with a solid state relay or AC sensor, the leakage current needs to be considered.
2. Operation beyond the Absolute Voltage Range or the Absolute Maximum Voltage may result in damage to the unit.
3. Once the unit is wired for low speed or high-speed count, then that unit is set for life - it cannot be changed.

|  |  |  |  |

| Part Number | Price | Description | Drawing |
| $5003-013$ | $\$ 2.00$ | Gasket | PDF |

## Counter Operation

Any of four different counting methods may be specified in each unit. These counting methods are factory set.
Dual Range: In the Dual Range Mode, the counter waits for a pulse on either Input A or Input B. The first input to have a pulse is recognized and its pulses are counted. The other input is ignored until the counter is reset. The rated speed for one of the inputs is 40 Hz and for the other input it is 500 Hz . This mode is best for single up-counter operation.

- Units are dispatched in a factory reset state.
- Once the unit is wired for low speed or high-speed count, then that unit is set for life - it cannot be changed.

## I/O Functions

The I/O functions can be mixed and matched to maximize the functionality of the counter. There are three types of inputs that the counter can accept. The interfaces for each are factory set. The inputs can be:

- Switch - open circuit or switch closure
- Low Voltage DC - Low input is less than 1VDC and High Input is $3-30 \mathrm{VDC}$.
- High Voltage DC or AC - Low is less than 3VDC or 3VAC. A High Input is either $10-300 \mathrm{VDC}$ or 20-300VAC.

For the Switch and Low Voltage DC Counters, there are six screw terminals for all of the I/O. For the High Voltage Counters, there are four screw terminals for the I/O. The combinations of the I/O and power supply are factory set.
Pulse Inputs: The pulse inputs are those inputs that are counted.
Remote Reset: When the remote reset is at a high level, the counter will reset.

## Resets

A reset returns the display to zero.
Remote Reset: A model with Remote reset has a dedicated terminal for performing the reset function. The unit resets when the remote reset signal is at a high level. When the reset signal is at a low level, accumulating counts can occur.

6320-2000-0000

The 6320 Series of electronic hour meters features self-powered electronic LCD counters. These meters utilize a high-contrast 8 -digit LCD with 0.32 inch [ 8 mm ] digits and seven icons. Dry Contact, Low Voltage DC, and High Voltage DC and AC Inputs are available on the rear panel.
The Model 63 family is designed with a rugged plastic housing that is NEMA 4/4X rated when properly installed using the optional gasket. In addition, the unit is compliant with CE's EMC standards to EN61326:2001 for industrial applications, recognized by UL for U.S. and Canadian safety standards, and it is compliant to European RoHS and WEEE standards.

Trumeter 6320 LCD Hour Meter Selection Guide

| Part Number | Price | Description | Drawing |
| :--- | :---: | :---: | :---: |
| $\underline{6320-0000-0000}$ | $\$ 35.50$ | LCD hour meter, dry contact input, remote reset | PDF |
| $\mathbf{6 3 2 0 - 1 0 0 0 - 0 0 0 0}$ | $\$ 35.50$ | LCD hour meter, 3-30 VDC input, remote reset | $\underline{\text { PDF }}$ |
| $6320-2000-0000$ | $\$ 35.50$ | LCD hour meter, 20-300 VAC $/ 10-300$ VDC input, remote reset | PDF |

| Trumeter 6320 LCD Hour Meter Specifications |  |  |  |
| :---: | :---: | :---: | :---: |
| Part Number | 6320-0000-0000 | 6320-1000-0000 | 6320-2000-0000 |
| Display | 8 LCD digits 0.32 in  high |  |  |
| Reset | Remote |  |  |
| Input | Dry contact input | 3-30 VDC input | 10-300/20-300 VDC/VAC input |
| Inputs | Switch (no voltage) <br> DC voltage: Absolute Voltage Range -0.5 VDC min to 30.0 VDC max; VIH 3.0 VDC max; VIL 1.0 VDC min High voltage AC/DC: Absolute Maximum Voltage 300 VAC/VDC; VIH 10VDC/20VAC max; VIL 3VDC/3VAC min |  |  |
| Power | Internally powered by lithium battery. Battery life 10 years (reduced to 5 years for temps above $100^{\circ} \mathrm{F}\left[37.8^{\circ} \mathrm{C}\right]$ ) |  |  |
| Mounting | Panel with clip (1/32 DIN panel cutout) |  |  |
| Terminations | Terminal block |  |  |
| Weight | 202 [57g] |  |  |
| Storage and Operating Temp | $-20^{\circ} \mathrm{C}$ to $+60^{\circ} \mathrm{C}\left[-4{ }^{\circ} \mathrm{F}\right.$ to $\left.+140^{\circ} \mathrm{F}\right]$ |  |  |
| Humidity | 0 to $95 \%$ RH, non-condensing |  |  |
| Vibration | Operating: 10 to $55 \mathrm{~Hz}, 0.01$ in [ 0.25 mm ] double amplitude - Non-operating: 10 to $55 \mathrm{~Hz}, 0.03$ in [ 0.75 mm ] double amplitude |  |  |
| Shock | Operating: 10G; Non-operating: 30G |  |  |
| Dielectric | 1000VAC $50 / 60 \mathrm{~Hz}$ for 1 minute |  |  |
| Accuracy | 100\% provided signal meets stated parameters |  |  |
| EMC Compliance: | EN61326:1997 with A1:1998 and A3:2001 for industrial environments |  |  |
| Enclosure | NEMA 4/4X, 12 \& IP66 compliant from the front when properly mounted using the optional gasket. |  |  |
| Approvals | CE compliant, UL and cUL recognized, UL file \#E36690 |  |  |
| Environmental Compliance | Compliant to European WEEE and RoHS |  |  |

## Notes

1. When interfacing with a solid state relay or AC sensor, the leakage current needs to be considered.
2. Operation beyond the Absolute Voltage Range or the Absolute Maximum Voltage may result in damage to the unit.

Mounting Gasket for Trumeter 6320 LCD Hour Meter

| :--- | :---: | :---: | :---: |
| $5003-013$ | $\$ 2.00$ | Gasket | PDF |

## LCD Hour Meter - Capabilities

## Hour Meter Operation

Hour counting method only. This counting method is factory set.
Hour Meter: The Hour Meter displays hours and tenths of hours.

## I/O Functions

The I/O functions can be mixed and matched to maximize the functionality of the Hour Meter. There are three types of inputs that the Hour Meter can accept. The interfaces for each are factory set. The inputs can be as follows:

- Switch: Open circuit or switch closure
- Low Voltage DC: Low input is less than 1VDC and High Input is 3-30VDC.
- High Voltage DC or AC: Low is less than 3VDC or 3VAC. A High Input is either 10-300 VDC or 20-300 VAC.

For the Switch and Low Voltage DC Hour Meters, there are six screw terminals for all of the I/O. For the High Voltage Hour Meters, there are four screw terminals for the I/O. The combinations of the I/O and power supply are factory set.
Enable Inputs: The enable inputs are those inputs that enable the accumulation of time.
Remote Reset: When the remote reset is at a high level, the Hour Meter will reset.

## Resets

Remote Reset: A model with Remote reset has a dedicated terminal for performing the reset function. The unit resets when the remote reset signal is at a high level. When the reset signal is at a low level, accumulating time can occur.

The $7111 / 7111 \mathrm{HV}$ counter is a compact, self-powered counter with bi-directional counting and screw terminals to ensure fast wiring.

## Features

- Latest CMOS circuitry for an expected battery life of 10 years
- Built-in screw terminals simplify installation
- 9mm black high-contrast LCD display
- 5-30 VDC externally powered backlight, requires resistor for voltages above 5VDC
- Counting up to 10 kHz (7111)
- The 7111 HV permits triggering from any voltage between 10-240 VAC or 10-110 VDC $\pm 10 \%$

## Applications

- Replacement for electro-mechanical counters
- Applications where external power is not readily available
- Contact closure/open collector low speed count input with integral debounce circuitry (7111 model)
- 1/32 DIN panel cutout
- Choice of mounting available - front panel with supplied bezel or rear mounting clip
- Front panel can be sealed to IP65 using included gasket
- CE, UL and cUL approved
- Position, length, rotation and distance measuring applications
- Event counting
- Water meter remote display

Trumeter 7111/7111HV LCD Counter Selection Guide

| Part Number | Price |  | Description |
| :--- | :--- | :--- | :---: |
| $\underline{7111}$ | $\$ 37.50$ | Drawing |  |
| $\underline{7111 H V}$ | $\$ 45.00$ | 8-digit self-powered totalizing counter | PDF |

| Trumeter 7111/7111HV LCD Counter Specifications |  |  |
| :---: | :---: | :---: |
| Part Number | 7111 | 7111HV |
| Battery | Non-replaceable lithium battery, expected life 10 years at $20^{\circ} \mathrm{C}\left[68^{\circ} \mathrm{F}\right\}$ |  |
| Display | 8 digit black LCD, 9 mm characters, leading zero blanking. 5-30 VDC externally powered backlight, requires resistor for voltages above 5VDC. Configurable decimal place: up to 3 decimal places (jumper link configured). |  |
| Count Range | 99999999 - rollover to 0 |  |
| Connections | Finger-proof screw connections for cables up to $1.5 \mathrm{~mm}^{2}$ |  |
| Operating temperature | $-10^{\circ} \mathrm{C}$ to $+60^{\circ} \mathrm{C}\left[14^{\circ} \mathrm{F}\right.$ to $\left.140^{\circ} \mathrm{F}\right]$ |  |
| Storage temperature | $-20^{\circ} \mathrm{C}$ to $+60^{\circ} \mathrm{C}\left[-4^{\circ} \mathrm{F}\right.$ to $\left.140^{\circ} \mathrm{F}\right]$ |  |
| Altitude | Up to 2000m [6562ft] |  |
| Relative Humidity | $80 \%$ max up to $31^{\circ} \mathrm{C}$, decreasing to $50 \%$ max at $40^{\circ} \mathrm{C}$ |  |
| Sealing | IP65 / NEMA4X |  |
| Mounting | Either with clip mount (supplied) or two front screws with bezel (supplied). 1/32 DIN panel cutout. |  |
| Manual Reset Enable | Configured by jumper link |  |
| Weight | 62g [2.2 oz] |  |
| Direction Input | Dry contact closure or electronic input TTL/CMOS compatible. Add=no connection or $>2.4 \mathrm{v}$ (logic 1); Subtract=connect to COMMON or <0.7v (logic 0 ). Direction input must precede count input by $5 \mu \mathrm{~S}$ (minimum) for valid operation. | Dry contact closure or electronic input TTL/CMOS compatible. Add=no connection or $>2.4 \mathrm{v}$ (logic 1); Subtract=connect to COMMON or $<0.7 \mathrm{v}$ (logic 0 ). Direction input must precede count input by $5 \mu \mathrm{~S}$ (minimum) for valid operation. Max 18VDC. |
| External Reset | Contact closure/open collector, negative edge triggered, 0.7 v threshold, 15 mS minimum closure time. | 10-110 VDC $\pm 10 \%, 10-240 \mathrm{VAC} \pm 10 \%, 50 \mathrm{~ms}$ minimum length. |
|  | Low speed: Contact closure/open collector with integral de-bounce circuitry. 30 Hz maximum, negative edge triggered, 0.7 v threshold, 15 ms minimum closure time. Max 18VDC. | $10-110 \mathrm{VDC} \pm 10 \%, 10-240 \mathrm{VAC} \pm 10 \%$, 50 ms minimum pulse width, 10 Hz . |
| Coun | High speed: Electronic input 10 kHz maximum, negative edge triggered, 0.7 v threshold $50 \mu \mathrm{~s}$ minimum pulse length, TTL/CMOS compatible. Max 18VDC. |  |
| Agency Approvals | UL file \#E36690 |  |

The Trumeter 7511/7511HV Self-Powered LCD Timer is a compact LCD timer designed for many applications and offering an optional high-voltage input. It features an 8-digit liquid crystal display timer and is self-powered with a 10year battery life. Screw terminals ensure fast wiring. Additional features include backlighting (external 5VDC supply required), 4 timing modes, timing direction indication and 9 mm high digits.

The High Voltage (HV) version accepts input voltages of 5-110 VDC or 10-240 VAC.

## Features

- Latest CMOS circuitry for an expected battery life of 10 years
- 9mm black high-contrast LCD display
- 5-30 VDC externally powered backlight, requires resistor for voltages above 5VDC
- Minimum contact closure time 1 second
- Four timing modes
- Times up or down
- External reset input
- Choice of mounting available - front panel with supplied bezel or rear mounting clip
- Front panel can be sealed to IP65 with included gasket
- 1/32 DIN panel cutout
- Simplified installation - all models have screw connections on rear for quick and simple connection
- CE, UL and cUL approved
- 7511 HV permits triggering from any voltage from 10-240 VAC or $5-110$ VDC $\pm 10 \%$.
