

# IDEM SCR31 Series Single/Dual Channel Viper Safety Relays

The Viper Safety Relay series from IDEM are designed with enhanced LED diagnostics and simplified wiring. Applications include guard door monitoring, emergency stop devices and sensors. The SCR31 series' internal logic uses force guided relays to achieve cross monitoring. This ensures that a single fault does not lead to the loss of the safety function and that all faults are detected at or before the next safety demand.

**Note:** Not for use with safety light curtains

## Features

- Single or dual channel operation
- Monitored manual or auto start/reset
- Up to 3 safety output contacts and 1 auxiliary output contact
- Easy diagnostics of status via 6 LEDs
- 22.5 mm DIN rail mounting

## Applications

**Automatic restart mode (single channel) non contact**

**Manual restart mode (dual channel) guard**

**Manual restart mode (dual channel) estop**

**Auto Reset**

**Manual Reset**

**Contactor Auto Feedback**

**Contactor Manual Feedback**

**Note:** A power supply unit with electrical isolation from the mains supply must be connected. External fusing of each safety output contact is necessary, a 4A slow-blow or 6A (quick action) must be provided. The maximum cabling and connecting resistance of control lines must not be exceed 300 Ohms.
