

# Wera Bit Drivers, Bits, & Adapters

## Tool-Check Modular Sets

Wera Tool-Check Modular sets deliver customizable tool organization that adapts to evolving job requirements. This innovative modular system allows professionals to combine, exchange, or expand individual tool modules at any time using simple rigid adapters and flexible hinges—creating a super-compact storage solution tailored to specific applications. Available in both metric and imperial configurations, the system includes precision screwdriver modules, socket and driver bit modules, and hex key modules that connect seamlessly for maximum space efficiency. Each module features durable construction with precision contour cutouts that secure tools in place while allowing easy removal. The modular design eliminates the need for bulky, one-size-fits-all toolboxes—professionals carry only the tools needed for each job while maintaining organized, protected storage. Whether purchasing complete pre-configured systems or building custom combinations from individual modules, Tool-Check Modular provides the flexibility and organization modern workflows demand.

## Features

- Modular system allows custom combinations based on job requirements
- Individual modules connect using rigid adapters (9549) and flexible hinges (9550)
- Available in metric and imperial configurations
- 21-piece socket and driver bit modules for manual and machine operations
- Precision screwdriver modules with 4mm hex drive bits for fine mechanical work
- Hex key modules with Hex-Plus profile for enhanced fastener contact
- Super-compact storage maximizes space efficiency
- Modules can be combined, exchanged, or expanded at any time
- Durable construction protects tools during transport and storage
- Complete systems or individual modules available for purchase

## Tool-Check Modular Sets

Wera Tool-Check Modular complete systems deliver comprehensive tool coverage in a fully integrated modular configuration. These 50-piece systems combine three specialized modules—socket and driver bits, precision screwdrivers, and hex keys—along with rigid adapters and flexible hinges for maximum versatility. Available in metric and imperial configurations, each system provides everything needed for diverse screwdriving applications from precision mechanical work to heavy-duty fastening. The pre-configured setup eliminates guesswork while maintaining full modularity—professionals can reconfigure, expand, or modify the system at any time as job requirements change. Super-compact storage and seamless module connectivity make these complete systems ideal for mobile professionals demanding organized, adaptable tool solutions.

## Features

- 50-piece complete system with three specialized tool modules
- Includes socket/driver bit module, precision screwdriver module, and hex key module
- Rigid adapter and flexible hinge enable custom configurations
- Covers manual screwdriving, machine operations, and precision mechanical work
- Available in metric or imperial configurations
- Modules can be reconfigured, exchanged, or expanded at any time

## Tool-Check Modular Sets

Wera Tool-Check Modular complete sets provide comprehensive screwdriving solutions in super-compact configurations. These 21-piece systems combine bitholding screwdrivers, bit ratchets, sockets, and versatile bits for both manual and machine-operated applications. Available in metric and imperial configurations, each set includes everything needed for diverse screw connections. The innovative modular design allows seamless expansion with additional modules using rigid adapters or flexible hinges, enabling professionals to customize their toolkit as requirements evolve.

## Features

- 21-piece tool set for manual and machine-operated screwdriving
- Kraftform handle with 1/4" hex drive bit mounting
- Fine-tooth bit ratchet with magnetic bit holder
- BiTorsion bits for Phillips, Pozidriv, Torx, slotted, and hex applications
- Includes four 1/4" sockets with square head adapter
- Available in metric or imperial configurations

## Tool-Check Modular Add-On Sets

Wera Tool-Check Modular add-on sets expand existing configurations with specialized tool modules for enhanced versatility. These compact expansion modules connect seamlessly to any Tool-Check Modular setup using the included rigid adapter, allowing professionals to build custom tool combinations based on evolving job requirements. The precision screwdriver module delivers 21 pieces optimized for fine mechanical work, while the hex key module provides chrome-plated L-keys with Hex-Plus profile for enhanced fastener contact. Each module integrates instantly into the modular system—no modifications required—maintaining the super-compact storage advantage while broadening application coverage.

## Features

- Seamlessly integrates with existing Tool-Check Modular systems
- Includes rigid adapter for secure module connection
- Precision screwdriver module features Kraftform Micro handle with rotating cap
- L-key module includes Hex-Plus profile for 20% more torque capacity
- Chrome-plated finish provides corrosion protection
- Laser-engraved size markings for easy identification

## Tool-Check Modular Accessories

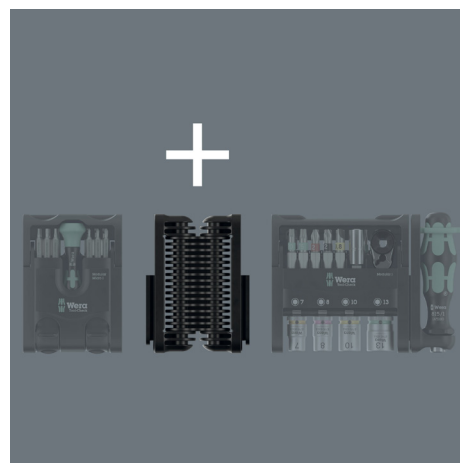

Wera Tool-Check Modular accessories enable unlimited configuration possibilities within the modular system. The rigid adapter provides solid, stable connections between modules for maximum compactness during transport and storage. The flexible hinge allows modules to fold together while maintaining secure connectivity, creating versatile configurations that adapt to workspace constraints. These simple connector components transform individual Tool-Check modules into customized tool systems—professionals can add, remove, or rearrange modules instantly based on specific job requirements. Whether building compact single-unit configurations or expanded multi-module setups, these accessories deliver the flexibility that makes Tool-Check Modular uniquely adaptable to evolving workflow demands.

## Features

- Rigid adapter provides stable, compact connection between modules
- Flexible hinge allows modules to fold for space-saving storage
- Enables unlimited custom configurations based on job requirements
- Simple connection system requires no tools or modifications
- Modules can be added, removed, or rearranged instantly
- Compatible with all Tool-Check Modular products
